Town Manager Report 1/28/21

Town Office/Town Clerk

- Looking to get the office records digitized by a professional firm. Met with morning with the rep from Records Management, waiting for a quote for the budget process

Public Works

- Steve has been working to keep sidewalks and transfer station sanded and safe.
- The loader needed some work on the brakes, its something we have worked on before, watching it to see if it is becoming a bigger problem.

Fire Department

- Terribly slow month for the department as of this week they had only had two calls for the entire month.

Transfer Station

- Met with the new universal solid waste provider, GiveITGetIT, looking more work involved in the process then we were doing before, but seems like its going to be a good thing.

Town Manager

- Have been working on budget stuff a lot lately, getting numbers, etc.
- Needed to call McKusick for the heatpump in the meeting room.
- Meeting scheduled with a fence fabricator for the canal fence.
- Working with the planning board and consultant to wrap the comprehensive plan work in the next month or so, should be able to have it ready for a vote at town meeting.
- Our GIS firm is currently working on the online viewer for all the assessing information
- A couple people have mentioned the snowroller sign, so I ordered new ones.
- Dangerous building hearing for 2/11 is still on tract to happen
- Bill Varney from Premium Choice is asking that the town pay our \$50,000 share over 3 years instead of 10 that suggested at the last meeting
- Have not had a chance to follow up with the sheriff's office yet about the Elliotsville Rd but will soon as I have a couple other things to discuss with them.
- Still working on the future of the trust funds and what they are intended for and what to do with them.
